4

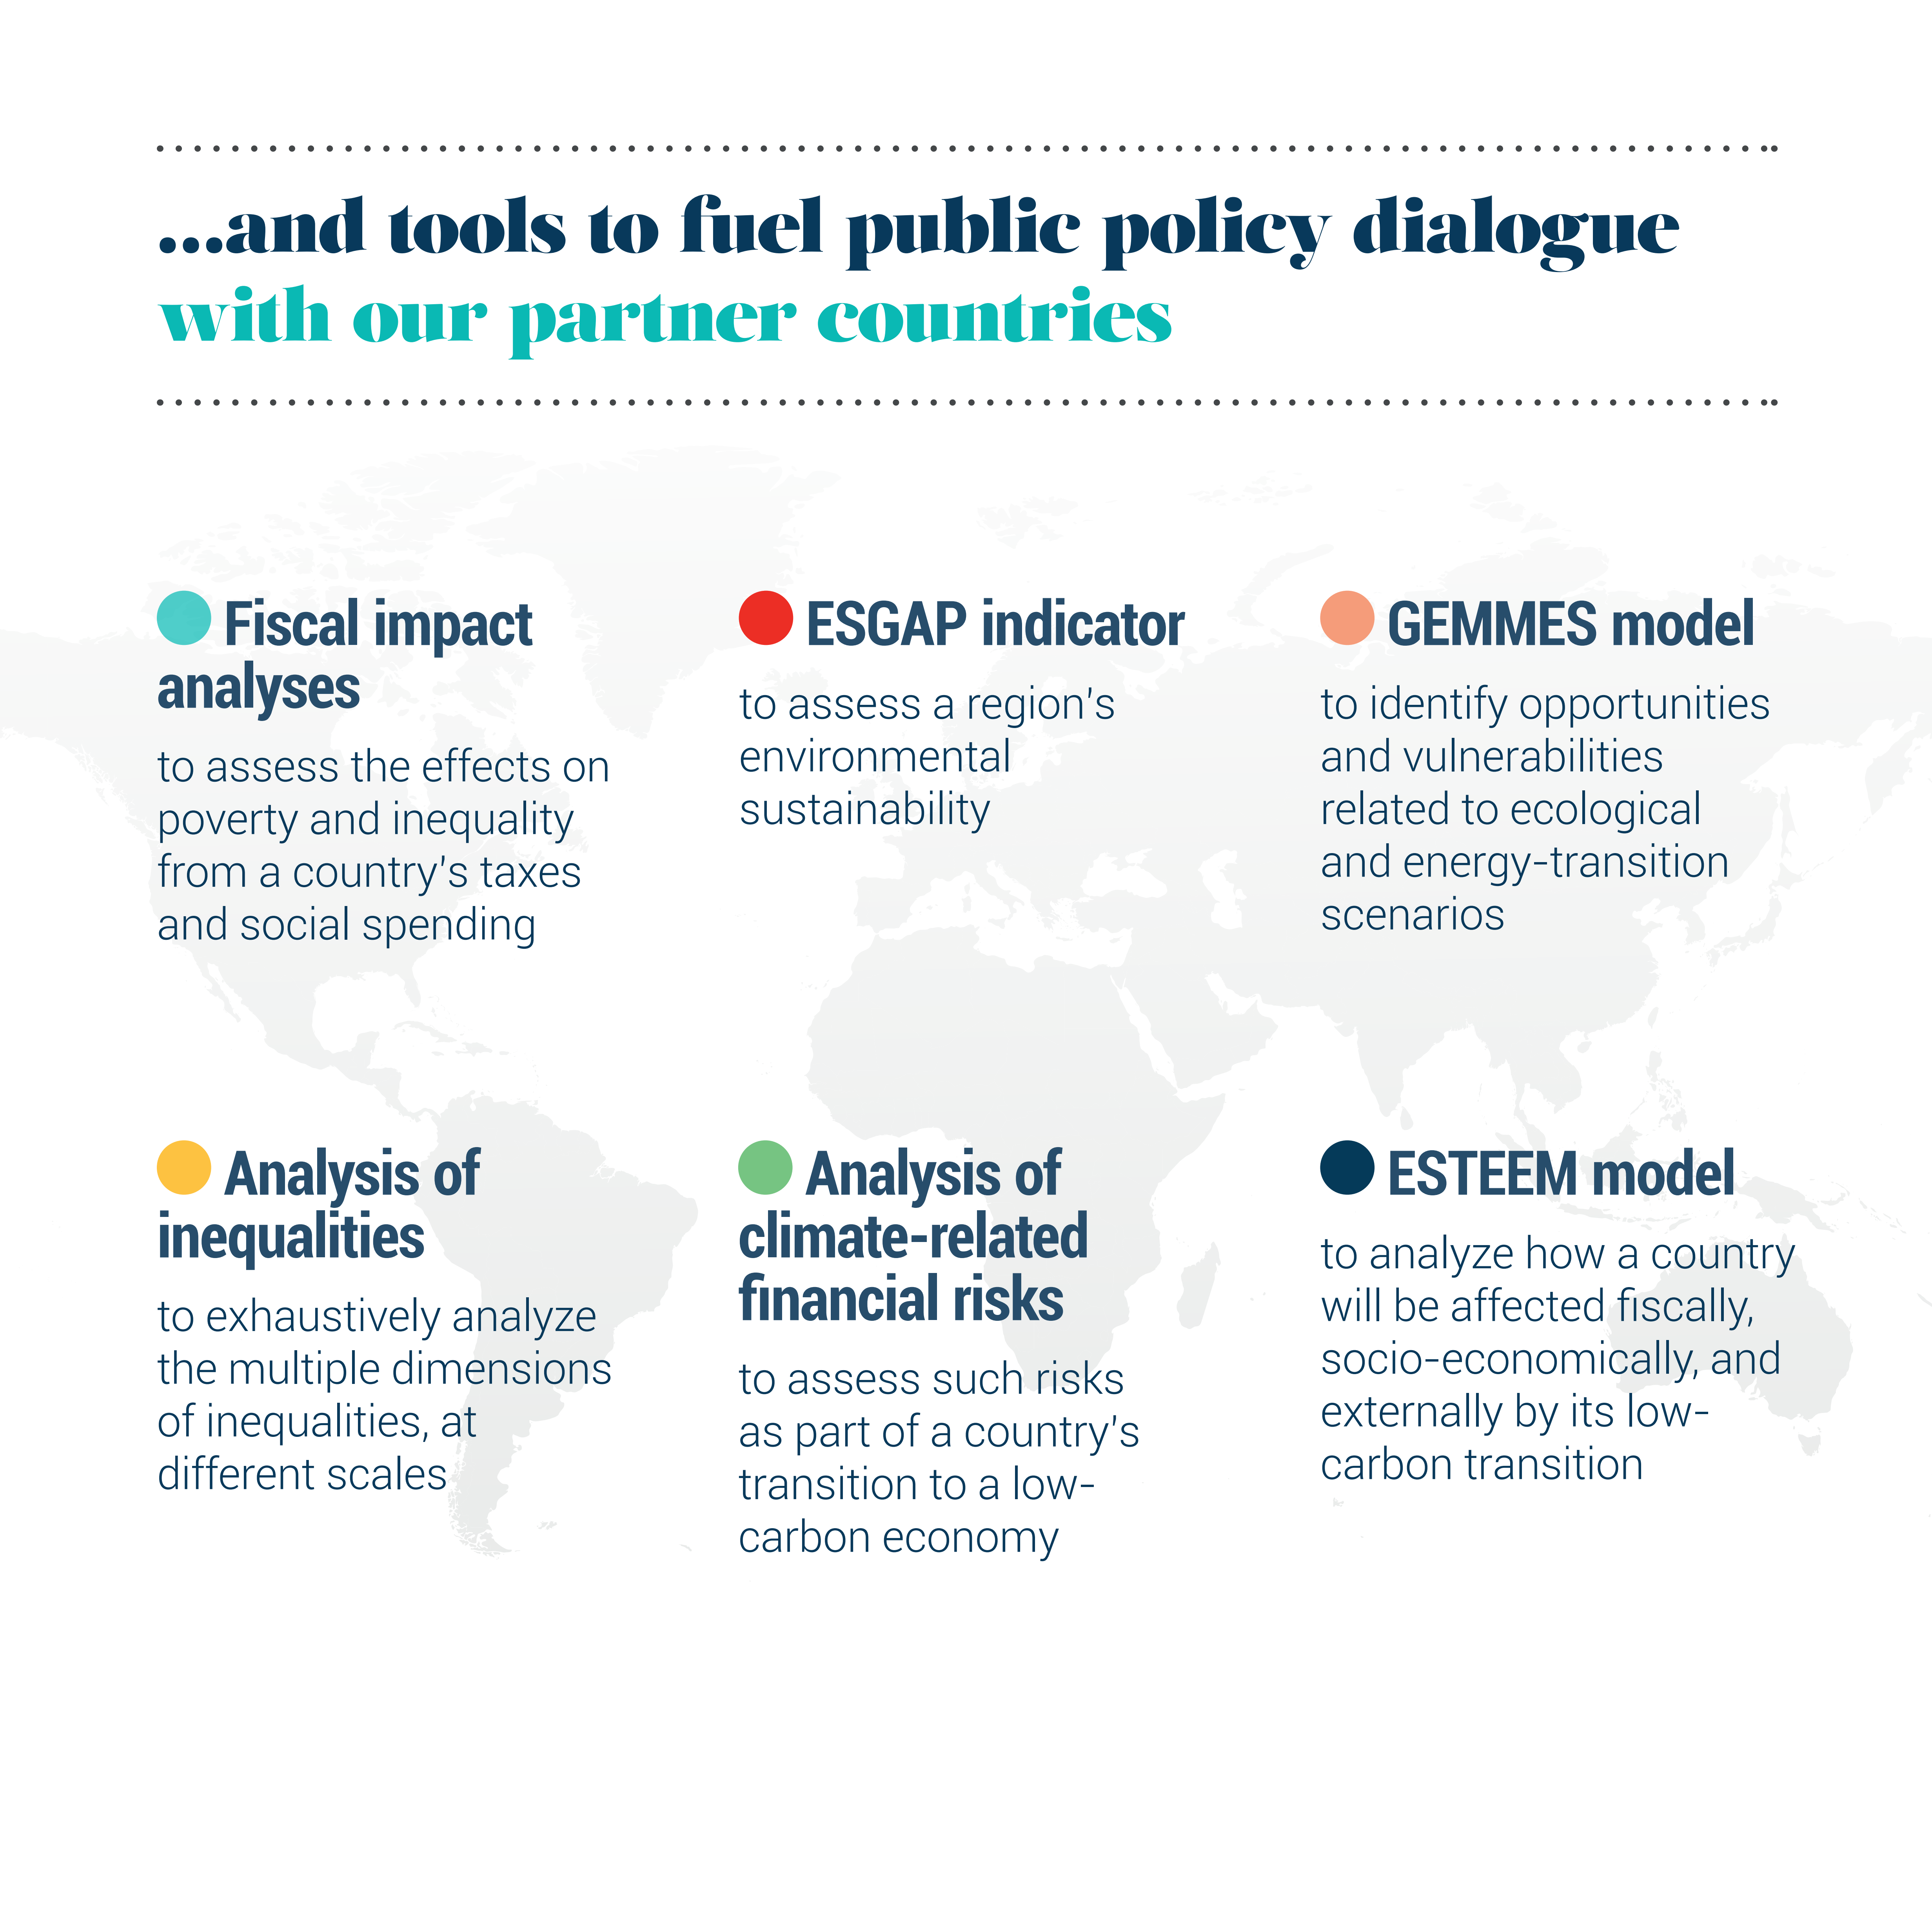

Economic
analysis

5

Ecological
transitions

...and tools to fuel public policy dialogue with our partner countries

Fiscal impact analyses

to assess the effects on poverty and inequality from a country's taxes and social spending

ESGAP indicator

to assess a region's environmental sustainability

GEMMES model

to identify opportunities and vulnerabilities related to ecological and energy-transition scenarios

Analysis of inequalities

to exhaustively analyze the multiple dimensions of inequalities, at different scales

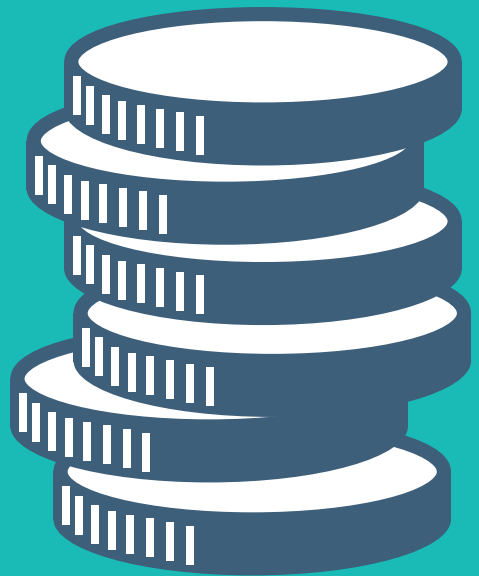

Analysis of climate-related financial risks

to assess such risks as part of a country's transition to a low-carbon economy

ESTEEM model

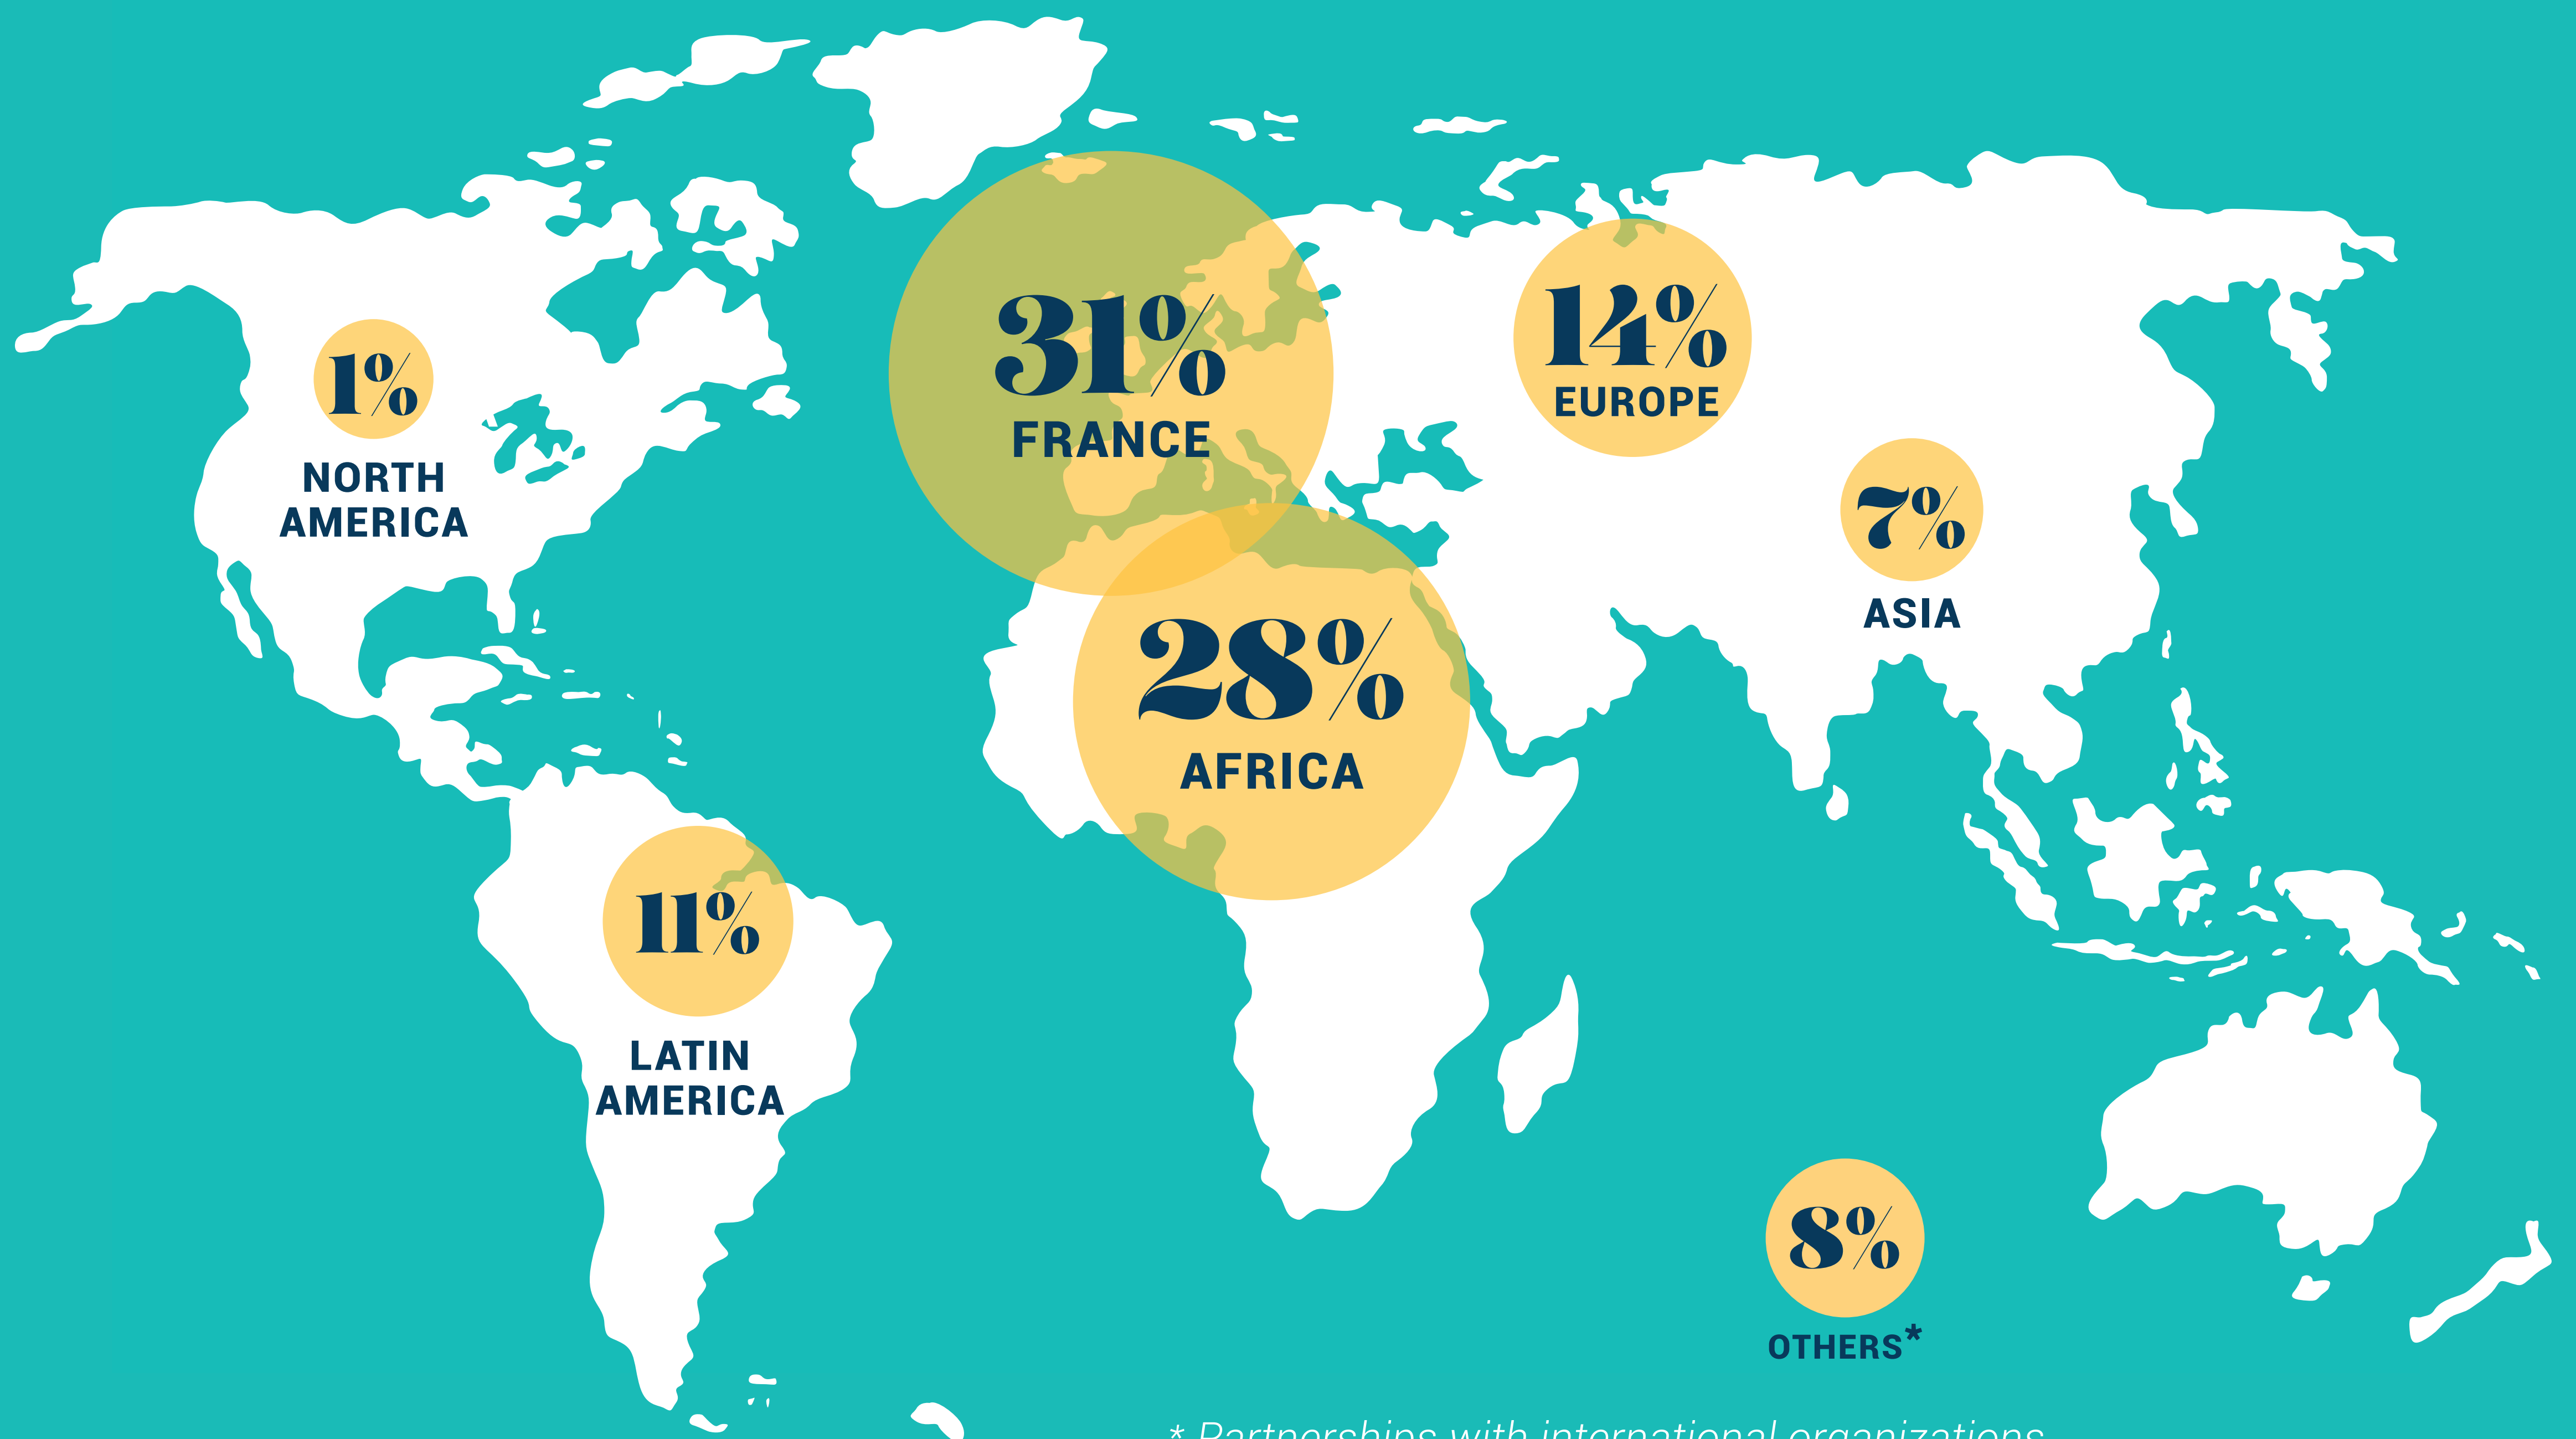

to analyze how a country will be affected fiscally, socio-economically, and externally by its low-carbon transition

Research partnerships, a core aspect of our approach

€2.6 M

devoted to studies and research projects
involving at least one partner from the region studied

* Partnerships with international organizations

A variety of output formats

28

events

attended by over 4,600 people,
47% of whom from the
Global South
